

IMAGE PROCESSING METHOD, PROGRAM OF THE SAME, AND IMAGE  
PROCESSING APPARATUS

5

ABSTRACT OF THE DISCLOSURE

An image processing method by which image  
information of a variety of artifacts can be easily  
searched through in accordance with attributes of the  
10 artifacts and the image information combined to easily  
produce a realistic image close to reality, comprising  
the steps of generating an artifact information object of  
clothing or another artifact by using element information  
object data indicating attributes of an element forming a  
15 component of the artifact and artifact generating  
processing object data indicating a processing procedure  
for generating the artifact by using the same, then  
combining the artifact and base artifact information  
object data of a base artifact such as a doll to generate  
20 image data of a scene of for example a doll with clothes  
on.
